

make room for life

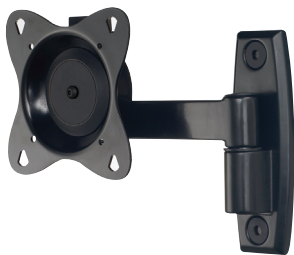

MOVE IN ANY DIRECTION 360°

2 VESA COMPATIBLE TV BRACKETS

WIRE MANAGEMENT CHANNEL

The innovative **Full-motion MF209** features **Virtual Axis 3D™ Technology** for effortless, fluid motion in every direction possible up to 24.1cm from the wall. Just set the tension knob and forget it. Keyholes on the faceplate slide onto the TV and into place for easy bracket alignment and installation. Includes two Vesa-compatible TV Brackets to fit virtually any 15" to 37" LCD TV. Ideal for corner installations in a room which make the TV appear to be floating. Don't forget- every Sanus Mount is **UL™** certified. This means the mount has been tested to hold four times its rated weight (in this case 27.2kg) for a minimum of one minute before coming off the wall. When you think safety, think Sanus. The **MF209** has another three family members that complete the range. Check them out on [www.sanus.com.au](http://www.sanus.com.au) If you are looking for quality, there's only one word you need to remember - **Sanus.**
