

➤ make room for life

Sanus Systems are a world leader in mounting and bracket solutions for the home. Every Sanus mount is UL Certified which means it has been tested to hold four times the weight for one minute.

Sanus really wants to "Make Room for Life" in your home with real world solutions. They do this by taking products which would normally sit on the floor or a cabinet and put them out of the way to give your family more room to live your life. www.htgroup.com.au
